

Title

Comparison of the Pre-Windsor & Post-Windsor Pharmaceutical Regulatory Framework in the United Kingdom (UK), Evaluation of Marketing Authorisation Procedures and Preparation of Dossier for Amorolfine Cream 5% W/V Under Regulation 51b of Human Medicines Regulations 2012 (As Amended).

Project Overview

This project was completed as part of the Master of Pharmacy (Regulatory Affairs) dissertation at CHARUSAT University. The research critically evaluates the regulatory transformation of the United Kingdom pharmaceutical framework following Brexit and the implementation of the Windsor Framework, with emphasis on MHRA marketing authorisation procedures, CTD dossier requirements, and regulatory strategy.

Objectives

- Compare Pre-Windsor and Post-Windsor regulatory frameworks.
- Evaluate MHRA marketing authorisation pathways.
- Analyse CTD Module 1 regulatory changes.
- Study UK-wide licensing under the Windsor Framework.
- Prepare a CTD Module 3 Quality Dossier for Amorolfine Cream 5% w/v under Regulation 51B.

Regulatory Areas Covered

- Brexit and Northern Ireland Protocol
- Windsor Framework
- MHRA Regulatory System
- Marketing Authorisation Procedures
- CTD & eCTD
- Module 1 Regional Requirements
- Module 3 Quality Documentation
- Pharmacovigilance
- Labelling & Packaging
- UK Human Medicines Regulations 2012

Project Deliverables

This dissertation presents a comprehensive comparative analysis of the Pre-Windsor and Post-Windsor pharmaceutical regulatory frameworks in the United Kingdom following Brexit and the implementation of the Windsor Framework. The study critically evaluates changes in MHRA marketing authorisation procedures, CTD requirements, pharmacovigilance, labelling, clinical trials, and UK-wide licensing under the Human Medicines Regulations 2012 (as amended). As the practical component of the project, a regulatory-quality CTD Module 3 (Quality) dossier for Amorolfine Cream 5% w/v was prepared for a generic submission under Regulation 51B, demonstrating regulatory documentation, pharmaceutical development, manufacturing information, stability data, and dossier preparation aligned with current UK regulatory requirements.

Skills Demonstrated

- Regulatory Strategy
- CTD/eCTD Preparation
- MHRA Regulatory Compliance
- UK Regulatory Affairs
- Literature Review
- Regulatory Gap Analysis
- Scientific Writing
- Pharmaceutical Documentation
- Marketing Authorisation Strategy
- Regulatory Intelligence
- Scientific Literature Review
- Technical Documentation
- Generic Drug Regulatory Strategy

Key Outcomes

- Analysed the transition from the EU-aligned regulatory system to an independent MHRA-led framework.
- Evaluated the impact of the Windsor Framework on regulatory submissions.
- Identified regulatory divergence in CTD Module 1 while demonstrating continued harmonisation of Modules 2–5.
- Demonstrated practical dossier preparation for a generic pharmaceutical product.

Technologies & Guidelines Used

- MHRA Guidance
- Human Medicines Regulations 2012
- ICH Guidelines
- CTD / eCTD
- EMA Guidance
- UK Windsor Framework
- Regulation 51B
- Microsoft Word, Microsoft PowerPoint, Microsoft Excel
